25X1A

Work was stopped temporarily because water broke through at a completed section of the trench and pumps were not available. The KWU Bauhof, Cottbus, had the contract for the work. A work force of 150 laborers, including those engaged for drainage work, worked one 8-hour shift. The traffic between the airfield and the town had to be rerouted via a new read because of the construction work on the eastern extension of the runway beyond the Cottbus-Burg road.

25X1A *

Comment. The airfield is occupied by a bomber regiment equipped with about 35 PE-2s.

25X1A Comment. Other sources confirm improvement work at delzow airfield where a hard surface runway is being built.

25X1A

Comment. Construction on the western extension of the runway has not been started but grading is being done there.
